

School Profile

Jember National Polytechnic

Established since 1988 as the Jember University Agricultural Polytechnic, now the Jember National Polytechnic (Polije) operates under the Ministry of Higher Education, Science and Technology (MoHEST). Its vision is to transform itself towards a leading, independent polytechnic specializing in agrotechnotropa with ASEAN competitiveness.

Industrial Sector Background

Indonesia's food and beverage industry contributes significantly to national economic growth. Ministry of Industry recorded a growth rate of 6.49% in the third quarter of 2025. In 2026, it is expected to remain a dominant force, contributing 7,64% to total GDP. The industry's primary growth is driven by Indonesia's massive and growing population. Java island contributed 54% to Indonesia F&B subsectors with East Java as the strongest contributor, followed by Central Java and West Java. In August 2025, F&B manufacturing employed approximately 6,67 million people across medium and large industries, as well as micro and small enterprises.

Curriculum

The Food Industry Technology (D3-FIT) programme consists of 61% practical work on campus, 39% theory, and an internship in the 5th semester. Meanwhile, the Food Engineering Technology (D4-FET) programme consists of 58% practical work on campus, 42% theory, and an internship in the 7th semester.
